

What data do you need?

1. Would the following uses of an application be best suited to using **instructions** or a **machine learning model**?

2. Pick one of the uses above that would benefit from using a model.
What data would you need to create that model?

Use	Data required
Identifying animals in a video	Images of animals, examples of the videos that will be used

Use

Forecasting air pollution

Data required

Current air pollution levels,
environmental measurement data
